The masq 2 face shield

Second generation of our vacuum molded face shield for professional use. The masq 2 is simple to use and comfortable to wear. It provides airborne aerosol protection from all sides and ensures crystal clear vision.

A perfect fit for everyone

We designed the masq for all faces: small or large, wide or narrow, with glasses or without. The masq adapts to your head shape using the integrated ribs, which easily flex around your forehead.

Simple to use

Just hook up the elastic band at the masq anchor points. That's it! Size is easily adjustable.

Clear view

The flattened visor provides unmatched clarity of vision. You can even wear larger eyewear without any hassle.

Easily customizable

You can easily customise your mask with just a pair of scissors. You can shorten the shield or combine it with a larger respirator.

No mist

The three integrated rib vents ensure vapor can escape easily, making the masq mist-free during regular use.

Easy to recycle

The shield is made from widely recyclable PET. The elastic band can be reused with multiple shields.

Certified protection

The shield provides airborne aerosol protection from all directions without compromising vision. Masq 2 is certified as Personal Protective Equipment - Category II, bearing the CE mark.

Shipping & storage

We designed the masq 2 with shipping and storage in mind as it is fully stackable. A pack of 100 takes up the same space as a box of regular office paper. This saves on shipping costs and protects the environment. The shields are now packed with a scratch protection.

Ready to ship

The masq 2 production facility is based in the Czech Republic, in the heart of Europe. And since the production is easily scalable, we are ready to supply any order size. Just drop us a message.
